THE HIGH PRICES will not come down until everybody saves money and quits spending.

It costs too much to build a new house, rents are high, taxes are high, new streets are high, cotton is high, food and labor is high. What are we doing to help matters? Spending money.

Let's save and be ready to buy bargains when prices take a tumble, as some day they must.

THE CHESTER BUILDING AND LOAN ASSOCIATION will sell stock at the same old low prices, only one dollar a share per month. The new series opens on Tuesday, October 11th, 1919. Call and give us your subscription now and be an investor.

You can borrow all the money you need to buy your home at the same old low rate of interest. Come and join us in the new series.

The Chester Building and Loan Association.

THE NEW ERA.

We are living in a new era. There is no parallel in all history for the changes that have taken place since 1914; more events have crowded themselves in these past few years than would ordinarily have come from a century of evolution. We are yet unfamiliar with this new world; we cannot measure the revolution of thought and feeling that has taken place, while the old order of society has dissolved, and the new taking shape. There are many possible forebodings about the outcome. It seems at times that the bitterness of the struggle through which we have just passed has brought forth all that is worse in human nature and the world is steadily going to the devil. New hatreds have been born and people's tempers are irritable and unreasonable; there are strikes, race riots, and recklessness everywhere. Even our recreations are an index to the world of the day; there is something very abnormal about the modern dance. It is really an expression of the disordered mood of the era. The whole thing is psychological and unnatural. People are just weary and mentally sick and it is going to take much patience and forbearance for the world to be cured. First, our leadership must come from the best in character and intellect—men of tolerance and fairness and mentally equal to the task ahead. Second, we need, individually, self-discipline, finer moral standards and ideals. The character of a people for a time is the sign of the character of its individuals. Third, for what overcomes this delusion about shorter hours and higher wages; everybody needs a reasonable amount of leisure and recreation, but a reasonable amount of work is needed, too. Every life we created to enrich time and community with the product of either hand or brain, rather than just for recreation. The demand for luxuries, more than for necessities, lies at the bottom of much of the call for higher wages. If people worked more efficiently, saved some money and found out the trouble with self and quit wondering what is the matter with the world, better conditions would follow. Beneath our faults, deep in the human soul, new forces of brotherhood and good are at work. "A loftier race than the world has known shall rise with the flame of freedom in their souls and the light of knowledge in their eyes." In this new era labor is to be the unrecognized king and equality and freedom its rule.

CORPORATION TO BUY ALL DISTRESS COTTON

Dillon County to Form Organization of Farmers of County Forced to Sell.

Diff. Sept. 12—A meeting of the Dillon County unit of the American Cotton Association has held this afternoon. Dr. J. H. Davis, county

In Olde Virginia

Where Cigarette Tobacco was born

"The wharves were the chief meeting place of the sailors. And there they would gather, pulling their pipes of rich Virginia tobacco, the white telling merry tales of foreign ports and of recent happenings in the colonies."
—Early Virginia Settlers

Don't lose any of that good Virginia-Carolina Taste

SUN-ripened—mellow Virginia-Carolina tobacco has a lively, appetizing taste that other tobaccos do not have.

But mark this—Virginia-Carolina tastes best when smoked straight. Mixing it with other leaf takes away some of that fine fullness of flavor.

If you want the real Virginia-Carolina flavor—all of it—smoke Piedmont.

The Virginia-Carolina Cigarette

Piedmont

NOTE—Virginia-Carolina tobacco, unlike foreign-grown tobacco, has no import duty to pay. That is why Piedmont's quality does not cost you more. Import duty does not make a cigarette taste any better. Why not get all your money's worth in tobacco quality?
L. J. Lippert, Jr., N. C.

The Stieff Reproducing Piano A Marvel

In the remarkable picturization of the playing of the world's master pianists, the Stieff Reproducing Piano represents the highest achievements of the development of the piano. We invite you to call at our showrooms at any time for a practical demonstration.

MICHELIN

Qual. Caut. 107
85°
Difference 22"

Where are you going to get those extra 22 inches?

Surprising though it may seem to the uninitiated, the inside circumference of any inflated tube runs 22 inches greater than the inside circumference.

Any inner tube when inflated is radically longer around its outer circumference than around its inner circumference as is shown by the illustration above.

Recognizing this basic principle, Michelin Scientists have built this difference into the Michelin Tube by making it air-shopped.

But every other tube is made point-by-point, its outer circumference being of practically the same length as its inner circumference. Since all tubes when in service must fit the inside of the casing, it is obvious that straight tubes must be stretched one 22 inches circumference to fit the rim of both wheels, whereas Michelin Tubes, being shaped to fit, are free from all strains of tension or compression.

Paul Hardin
Chester, S. C.

chairman, presided. A report was the public heard from T. L. Manning, temporary secretary, who was sent as a delegate to the New Orleans convention. A report was made of the membership of the county association and money collected as follows: Membership 508, money collected, \$3,400. Committee volunteered to go into the districts not yet worked and obtain members in them. It is not feared that less than 1,000 members will be secured in this county.

Mr. Manning made a strong address and outlined a method of tracing cars of the cotton crop and enable the farmer to get his price of 36 cents and above. It is certain that Dillon County will organize a corporation very soon to take up all the distress cotton put upon the market. The plan is outlined in that the corporation shall buy all the cotton offered at a quarter of a cent above any price offered by any other buyer or factor until the price of 36 cents is reached.

Dillon County will need a \$300,000 corporation and it is believed by almost every farmer that the capital stock could be secured within 48 hours.

A mass meeting of the farmers to gather with all the reduction membership is planned for Friday, September 19. L. D. Jennings of Sumter, originator of the county corporation plan, will be present and address the gathering.
